SAVE THE DATE for CMV2012

The combined meetings of the Congenital CMV Conference and CMV/Betaherpesvirus Workshop will be held October 29 to November 2, 2012 in San Francisco, CA. at the Mission Bay Conference Center, a unique venue in the breathtaking new biotech hub of the University of California, San Francisco.

- Scientists, public health officials, policy makers, industry representatives, and individuals affected by congenital CMV infection will meet together to discuss the latest findings and the most pressing and urgent issues on the biology, epidemiology, clinical effects, diagnosis, treatment and prevention strategies for CMV infection and disease.
- Days 1 and 2 of CMV2012 will focus on congenital CMV infection and disease, including clinical pathogenesis, epidemiology, newborn screening, treatments, and public awareness.
- Day 3 of CMV2012 will be devoted to the latest discoveries in CMV vaccines.
- Days 4 and 5 of CMV2012 will focus on the molecular virology of CMV, with emphasis on virus-cell interactions, viral replication, antiviral immunity, viral modulation of host immune responses, and CMV disease associated with transplantation.
- A mid meeting break will include a contemporary arts display and delicious California cuisine at the San Francisco Museum of Modern Art.
- Families and friends of children affected by Congenital CMV disease and adult survivors are welcome to attend the first half of the CMV2012 conference.
